Professional Summary

Computer Science graduate with internship experience in Edge AI and practical experience across Python, SQL, Power BI, and database technologies. Built projects involving real-time object detection, enterprise data warehousing, business intelligence dashboards, and speech emotion recognition. Strong foundation in software development, data analysis, database design, and machine learning, with a focus on solving technical problems through practical implementation.

Technical Skills

Programming: Python, SQL, T-SQL
Visualization: Power BI, DAX, Power Query, Data Analysis, Data Visualization, Data Cleaning
Data Engineering Concepts: SQL Server, Data Modeling, ETL, Data Warehousing
Cloud: Microsoft Azure, AWS
AI & Machine Learning: TensorFlow, Deep Learning

Experience

Accrete Globus Technology Pvt. Ltd. **Aug 2026 – Present**
Associate Business Analyst – Trainee *Hyderabad, India*

- Working with SixOrbit across sales, purchase, inventory, accounting, and customer and vendor management workflows.
- Working with structured business data, including customer, vendor, item, inventory, invoice, and voucher records.
- Learning business process workflows, system configuration, user roles, taxation, and CSV-based data uploads.

Automotive Robotics India Pvt. Ltd. (ARI) **Apr 2025 – Jul 2025**
Software Developer Intern *Hyderabad, India*

- Developed an AI-based wildlife detection system using Python and TensorFlow for real-time object detection on embedded edge devices.
- Implemented image preprocessing and optimized lightweight deep learning models for deployment using NNCase.
- Tested and validated models on embedded hardware to troubleshoot deployment issues and improve real-time inference reliability.

Projects

Enterprise Data Warehouse | *SQL Server, T-SQL, ETL, Star Schema*

- Designed an Enterprise Data Warehouse using SQL Server and Medallion Architecture to transform raw data into analytics-ready datasets.
- Developed T-SQL ETL pipelines for data extraction, cleansing, transformation, and loading across processing layers.
- Created Star Schema fact and dimension models to support analytical reporting and business intelligence.

Financial Performance Intelligence Dashboard | *Power BI, DAX, Power Query, Data Modeling*

- Developed an interactive Power BI dashboard to analyze revenue, profit, expenses, and key financial KPIs.
- Transformed source data using Power Query and created DAX measures for dynamic KPI reporting.
- Designed data models and visualizations to identify profitability trends and high-performing segments.

Voice-Verse – Speech Emotion Recognition | *Python, TensorFlow, Deep Learning*

- Developed a speech emotion recognition system using CNN and LSTM models to classify emotions from audio recordings.
- Performed audio preprocessing and extracted MFCC features to capture relevant emotional patterns.
- Built an end-to-end emotion classification pipeline for intelligent voice and human-computer interaction applications.

Education

Malla Reddy University **2021 – 2025**
Bachelor of Science in Computer Science

Certifications

- Microsoft Certified: Power BI Data Analyst Associate (PL-300) – Microsoft, 2026
- Microsoft Certified: Fabric Data Engineer Associate (DP-700) – Microsoft, 2026
- Oracle Cloud Infrastructure: Generative AI Professional – Oracle, 2024
- NPTEL: Data Analytics with Python – 2024
